Social Automation for real-life connection

Hakeem Shitta-Bey

Natnael Worku

Christopher Lee Williams

Were surrounded by people physically and digitally but lonelier than ever

Were surrounded by people
physically and digitally but
lonelier than ever

Similar Issues Arise at PWIs and other social spaces

**We are surrounded by
technology, but not
always pulled toward
each other.**

Disconnection costs us more than friendship.

- Missed Mentorship
- Missed Belonging
- Missed Opportunities
- Weaker Communities

Current Solutions - Social Medias

- Started off as Social Networks
- But shifted towards Social Medias
 - Optimized for screen time
 - Built for content not connection

The problem is not just finding people. It is the effort it takes to actually connect.

- Reaching out
 - Scheduling
- Follow through
- Building habits

Social Automation

Using technology to lower the energy required to engage in the social habits that connect us.
